

# STEM FOR LIFE

## TALENTED YOUTH IN INDUSTRY

# 2022 PROGRAM

Calling all youth to build their  
talents and skills to be leaders  
of the industries of the future

# STEM FOR LIFE 2022 PROGRAM

## ALL NEW ADNOC STEM FOR LIFE PROGRAM!

Welcome to a brand new ADNOC STEM for Life, launching in 2022. We will continue to deliver amazing STEM challenges, competitions and activities, but in a shiny new package. Read on to learn all about it.

## TALENTED YOUTH IN INDUSTRY CLUB

Over the past two years, the students and schools of the UAE have shown us their talent. We have been impressed by your creativity, intellect and problem solving skills. That is why we are bringing you the Talented Youth in Industry Club for 2022.

Our goal is to get you excited about the industrial sectors that are vital to the wellbeing of our society, while helping you build skills and develop a vision for the future. We are also excited to share with you the latest innovations in the oil and gas industry and how ADNOC is actively working to build a bright future.

## HOW IT WORKS...

The STEM for Life team is launching a STEM club for talented youth that are excited about industry. Teachers across the UAE have an opportunity to join and host a Talented Youth in Industry Club at their schools. We will provide teachers with all the materials that they need to run the club. Parents may also run a club at home if they choose.

Clubs will offer a menu of exciting activities, challenges and competitions. Teachers and students can choose the activities they are excited about to gain points, level up, earn badges and win prizes. Sign up for our information session today!

**Students, Teachers and Parents...Click here to register!**
