

# Zoom 5.0 is here!

After May 30, 2020, all Zoom clients on older versions are required to upgrade before joining any Zoom meetings as **GCM Encryption (Security)** will be fully enabled for all zoom meetings.

This update will provide increased protection for meeting data and resistance against tampering

**All parents are requested to update the Zoom app, please visit <https://zoom.us/download2>**

With Zoom 5.0 update, Security controls are now grouped together and found by clicking the Security icon on the host meeting menu bar.
