GIRLS OF THE FUTURE

ONLINE WORKSHOP GIRLS4TECH

Dear Educators,

One of our key objectives, as Expo School Programme, is to provide students with inspiring learning experiences that would prepare them for the jobs of the future.

That's why we have teamed up with Mastercard and their signature Girls4Tech (G4T) program, where young girls can uncover science, technology, engineering and math (STEM) principles through inquiry-based activities and real-world challenges.

Through G4T, your students will have the opportunity to play the role of several Mastercard STEM professionals including: Cryptologist, Fraud Detective, Data Scientist, and Design Engineer!

Together through this virtual workshop, we aim to nourish the next generation of problem solvers and creative thinkers.

Join us **Monday, March 8th at 10AM** as we discover the incredible world of technology and learn about the real-world skills you'll need to have a successful career in STEM!

We cannot wait to see you there.

Date: March 8 2021

Time: 10:00 am

Duration: 45 minutes

Ages: 8-11
