

ANNUAL SCIENCE PROJECT EXHIBITION 2026

Dear Students and Parents,

Our school will be conducting the **Annual Science Project Exhibition 2026**. The completed projects will be due on **1st June 2026**.

This will be a whole-school Science fair/exhibition, and every student is strongly encouraged to participate.

PARTICIPATION GUIDELINES:

Year 1 to Year 3 : Students will create Science posters on A3-size paper based on Science topics suggested below.

Year 4 to Year 10 : Students will complete their projects individually.

Year 12 : Students will work in groups assigned by their respective Science teachers.

The submission timeline has been carefully planned to provide students with ample time to complete their work at a steady and comfortable pace.

The project will be assessed out of **20 marks**, which will contribute to the students' **Final Summative Assessment**.

A Science project challenges students to solve a problem or answer a question using the scientific method or design process.

It is a wonderful opportunity to:

- Develop scientific thinking skills.
- Encourage curiosity and creativity.
- Foster innovation and problem-solving abilities.

Students are encouraged to select topics that genuinely interest them. Projects should be meaningful, connected to real-world experiences, and where possible, presented as a **working model**.

Please note:

- All work must be completed by the student.
- Parents may support by offering guidance, encouragement, and by monitoring progress.
- A successful project does not need to be expensive—many outstanding projects can be created using simple materials available at home.

Top projects from each class will be selected for display at the school exhibition. Selected students will also have the opportunity to present their models and findings.

Further details, including assessment criteria and specific guidelines, will be shared on Google Classroom by your child's Science teacher and discussed during Science lessons.

Thank you for your continued support in making this a meaningful and exciting learning experience for our students.

SUGGESTED POSTER TOPICS (YEAR 1-3)

- **Say NO to plastics.**
- **Save Water, Save Life (Importance of water conservation in the UAE).**
- **Solar Energy: Power from the Sun.**
- **Endangered Species in UAE.**
- **Keeping Our Environment Clean.**
- **Reduce, Reuse, Recycle.**
- **The Importance of Trees (Mangroves in the UAE).**
- **Healthy Habits for a Healthy Life.**
- **Save Earth from Pollution.**
- **My Green City (Eco-friendly living).**
